

Ultralyd avstandsmåler - analog utgave

Produktkode: 204aa

Tilgjengelighet: 1

Lager : A2

Pris: kr. 150,00

Short Description

Professional Ultrasonic Wave Detector Ranging Module for APM2 2.5 2.6 2.8 Flight

Beskrivelse

Description :

- APM2 ultrasonsonic module, do not need to modify APM software
- With installation hole for fixation
- This module can replace XL-EZ0
- The module A0 is connected to flight control A0, GND VCC can be directly connect with flight control board
- Detection range: 20cm-300cm

Package includes:

- Ultrasonic module x 1
- Connecting cable x 1
- Installation spacer x 2

Usage:

- 1 Supported Sonars
- 2 Building a cable to reduce sonar noise
- 3 Connecting the Sonar Sensor on APM 2.x
- 4 Connecting the Sonar Sensor on PX4
- 5 Mounting the Sonar Sensor

- 6 Enabling the Sonar through Planner
- 7 Testing the sonar
- 8 Tuning the gain
- 9 Sonar Maximum Altitude
- 10 Cold weather performance
- 11 Other Potential Causes of Sonar Noise

Oppsettet for bruk i drone finner du her
