Produktkode: 591aa
Tilgjengelighet: Opp til 1 mnd leveringstid
Custom Field 5 (Location): M 5

Pris: kr. 65,00

Kort beskrivelse
ATtiny85 attiny digispark kickstarter micro usb development board mod rI

Beskrivelse

Description

Art Mel ATtiny model single chip integrated with Couette Mel AVR micro controller and flash memory, including 1KB to 4KB, with a 32 KB to 256 KB SRAM. In addition,

these devices support SPI and TWI (with the I2C- compatibility) communication,

provides maximum flexibility and the working voltage of 1.8V to 5.5V.

ATtinyAVR uses the Aite Mel patented picoPower technology,low power consumption.

Through software control system clock frequency,

to achieve the best balance between the system performance and power consumption, but also has been widely applied.
