

Led driver 50 v pwm

Produktkode: 956aa

Tilgjengelighet: 2

Pris: kr. 75,00

Short Description

Color: H 1A 8-50V no Pin

Beskrivelse

Product sellpoints

- **Brushed Motor Controller | What Is A Power Control Module**
| Adjustable Current Range: Offers 1-3A output current and adjustability via RCS resistance or PWM control for versatile LED lighting solutions.
- **High Efficiency:** Achieves up to 97% efficiency, ensuring minimal power loss and optimal performance for LED applications.
- **Wide Input Voltage Range:** Supports DC 6-50V input, making it suitable for various LED setups from 6V to 48V, enhancing compatibility.
- **High Brightness Output:** Capable of driving high-brightness LEDs with a maximum output power of 72W at 36V/2A, ideal for illumination needs.
- **Integrated Protection:** Features inherent open-circuit LED protection, safeguarding your LEDs from potential damage.
