4 stk synkronmotorer 150W 980KV

Produktkode: 227aa
Tilgjengelighet: Opp til 1 mnd leveringstid
Weight: 20.00g

Pris: kr. 390,00

Kort beskrivelse
4 X Emax XA2212 980KV Brushless Motor for Quadcopter X-copter

Beskrivelse

chatGPT

The Emax XA2212 980KV Brushless Motor typically has a Y-wired (also known as star-wired) configuration. In a Y-wired setup, the three motor phases are connected to form a Y shape. This is a common configuration for brushless motors used in multirotor drones

and other RC (radio-controlled) applications. It's worth noting that the specific wiring configuration can vary among different motor models, so it's always a good idea to refer to the manufacturer's documentation or specifications for accurate information.
