4x led matrix display

Produktkode: 279aa
Tilgjengelighet: 1
Weight: 20.00g

Pris: kr. 150,00

Kort beskrivelse
4 Way MAX7219 dot matrix moving message display module for arduino esp8266,

Beskrivelse

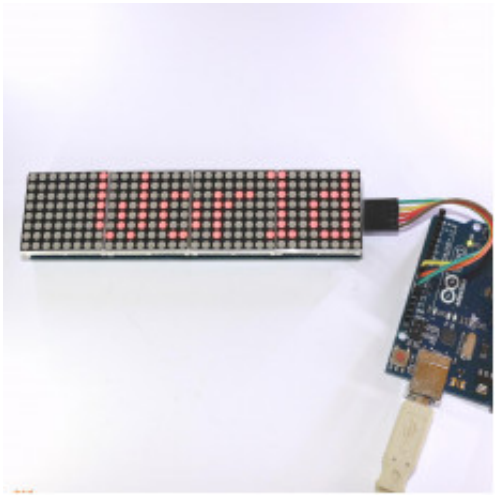

4 Way MAX7219 dot matrix moving message display module for arduino esp8266, UK s

4 Way MAX7219 dot matrix moving message display module for arduino and esp8266 not included. These modules can be used to construct a moving message display. They can be cascaded together to make longer displays. I have a library that can be used with this module as the MaxMatrix library is unable to rotate the display. These modules have the advantage in that you can create a moving message display without all the messy wiring between modules.

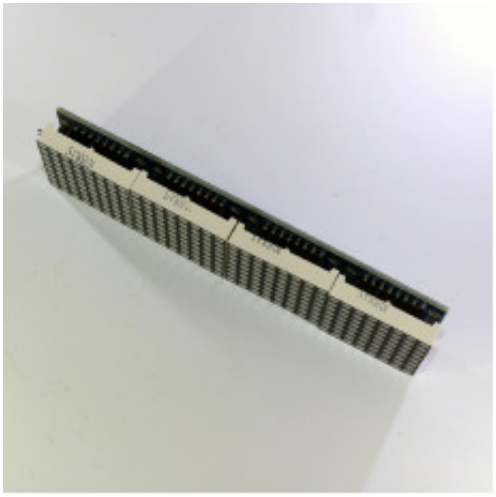

The Library can be found here https://github.com/iotmodules/fourMatrix.git
