# Waterproof DS18B20 Temperature Temp Sensor Digital Thermal Probe

**Produktkode:** 594aa
**Tilgjengelighet:** 3
**Weight:** 20.00g

## Pris: kr. 55,00

**Kort beskrivelse**
Waterproof DS18B20 Temperature Temp Sensor Digital Thermal Probe 1M For Arduino

**Beskrivelse**
1.Brand New High Quality

2.The probe the temperature sensor DS18B20 original chip
3.High quality stainless steel tube encapsulation waterproof moistureproof prevent rust
4.Stainless steel shell 6*50mm

5.Power supply range: 3.0V to 5.5V
6.Operating temperature range: -55°C to +125°C (-67°F to +257°F)
7.Storage temperature range: -55°C to +125°C (-67°F to +257°F)
8.Accuracy over the range of -10°C to +85°C: ±0.5°C.
9.No other components, unique single bus interface
10.Output lead: red (VCC), yellow(DATA) , black(GND)
11.Cable length: 100 cm

**Package Included:**

1 x Waterproof DS18B20 Temperature Temp Sensor Digital Thermal Probe For Arduino
