43A PID Motor Driver

Produktkode: 158aa
Tilgjengelighet: Opp til 1 mnd leveringstid
Weight: 20.00g

Pris: kr. 180,00

Kort beskrivelse
Double BTS7960B 43A Motor Driver High-power module/smart car driver For Arduino

Beskrivelse

Feature:

This driver uses Infineon chips BTS7960 composed of high-power drive full H-bri
current protection. Double BTS7960 H-bridge driver circuit, with a strong drive a
microcontroller and motor driver! High-current 4

Features:

Double BTS7960 large current (43 A) H bridge dr

5V isolate with MCU, and effectively protect MC

5V power indicator on board;

voltage indication of motor driver output end

can solder heat sink;

Just need four lines from MCU to driver module (GND. 5V. I

isolation chip 5 V power supply (can share with MC

size: 4 * 5 * 1.2 cm;

Able to reverse the motor forward, two PWM input frequenc
two heat flow passing through an error signal out
isolated chip 5V power supply (can be shared with the MCU 5V), can also
the supply voltage 5.5V to 27V;

Package list :

BTS7960B motor driver X 1
