APC220 RF transmitter set

Produktkode: 161aa
Tilgjengelighet: 4
Weight: 20.00g
Custom Field 5 (Location): H 4

Pris: kr. 680,00

Kort beskrivelse
'APC220 Wireless RF serial Data Modules With Antennas USB Converter

Beskrivelse
Introduction

The APC220 radio module provides a simple and economic solution to wireless data communications. The employment of an embedded high speed microprocessor and high performance IC creates a transparent UART/TTL interface, and elminates any need for packetizing and data encoding.

What is included?

ACP220 Module x2

Antenna x2

USB Dongle x1

Features

- **Work Frequency Range: 418- 455MHz**

- **19200bps transfer rate**
- **Transmit distance up to 1000m (line of sight) @9600 bps**
- **256 bytes data buffer**
- **High sensitivity (-112dbbm @9600 bps)**
- **GFSK modulation**
- **online settings parameter**
- **UART/TTL interface**
- **Embedded watch dog**
- **Dimensions: 39mm x 19mm x 2.8mm**
- **The RF Modules (pair) offer two way communications over long distances. Use the modules directly via USB or connect them to your microcontroller.**
