Kort beskrivelse
Adapter for ESP-01S ESP8266 ESP-01 Wifi Transceiver Module Breakout

Beskrivelse

Adapter for ESP-01S ESP8266 ESP-01 Wifi Transceiver Module Breakout

Description:

This is a breadboard adapter for the popular ESP-01 model of the ESP8266 serial-to-WiFi transceiver module.
As ESP-01 Pin arrangements are not breadboard friendly and are not labeled, which makes it little inconvenient for rapid prototyping.This breadboard adapter will help you to make

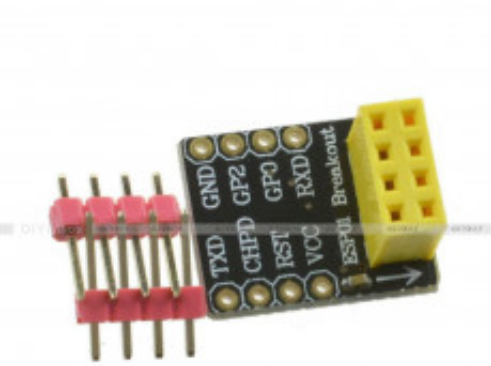

prototyping with esp-01 module much more easier.
This breakout conveniently offers clear pinout silkprint on top and will nicely fit your prefered breadboard.
Last but not least, we added a 0.1µF decoupling capacitor so the ESP-01 will always run smoothly and without a hitch.
Connection:

URAT Adapter
3.3V VCC
3.3V CH-PD
TX RX
RX TX
Choose both NL CR 15200 baud rate

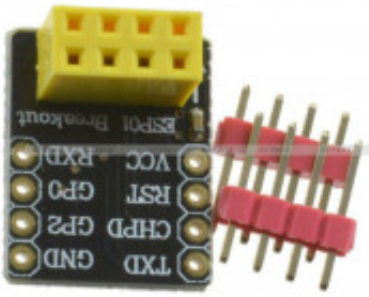

Package Included:

1/2/5/10 X (ESP-01 Breakout Board Breadboard Adapter+2*4P male header)
