3 Axis Brushless Gimbal Mount

Produktkode: 760aa
Tilgjengelighet: Opp til 1 mnd leveringstid
Weight: 0.00kg
Custom Field 5 (Location): drone

Pris: kr. 1.500,00

Kort beskrivelse
3 Axis Brushless Gimbal Mount Stabilizer for Gopro 3/4 FPV Drone Storm32 FPV

Beskrivelse
Features:
- Simple structure and light weight,CNC aluminum alloy structure
- Brushless motor direct drive
- With anti-vibration rubber balls,easy to adjust
- Compatible with Gopro 4 3,2,1
- With 3pcs 2804 160t motor
- With 32bit Storm32 firmware gimbal controller, sensor
- With motor protector which can help heat dissipation

Specifications:
- Power supply: 9-15V(3-4S)
- Drive current: Max.1.5A
- Height: 11cm
- Color: Black

Features of Strom32 Gimbal Controller:
- The controller can be used for building high-quality 3-axis camera stabilizing systems which can
handheld camera stabilizers.
- This version of the controller is our new direction in the development of the stabilizing solutions
- It will replace the previous 8-bit version of the SimpleBGC controller, keeping 100% back-comp
- 32-bit MCU — ARM Cortex M4.

- Effectively calculates the complex tasks for 3-axis stabilization,700 times/seconds gyro caculates
- Allows camera control with the RC or analog joystick.
- Use several switchable profiles for different modes of operation
- Control Pitch or roll by PWM or receiver,supports variety of RC protocols: PWM, Sum-PPM, sp
- Use IMU1 and on board IMU2 dual sensor module, lock YAW accuratly, stable performance
- Support follow mode,lock mode,absolute mode or speed mode

Please read the following terms carefully before perchasing

Package Contents

- 1 x Aluminum gimbal installed 3 motors
  1 x 32bit Storm32 Gimbal controller
  1 x Sensor

- In 100% working order.
